

## **TRUSTED COMPUTING GROUP (TCG) WITH HP NETWORKING, INFOBLOX, JUNIPER NETWORKS, LUMETA AND OPENSEA HOST NETWORK SECURITY DEMOS AT INTEROP LAS VEGAS**

**What:** [Trusted Computing Group](#) (TCG) members HP Networking, Infoblox, Juniper Networks, Lumeta and [OpenSEA](#) will show network security around the enterprise in a series of demonstrations, "TNC Everywhere: Unified Security", at [Interop Las Vegas](#) 2010.

Attendees can learn how to integrate physical and logical access control, coordinate a variety of security solutions such as data leak prevention and endpoint health checking, and defend all parts of the enterprise environment - including traditional IT and interconnected control system networks. Open standards from TCG and the IETF will be shown in action and enabling existing and new products.

**When:** Exhibit hours Tues., April 27 – Thurs., April 29

**Where:** Interop Las Vegas 2010, Mandalay Bay, Las Vegas, Booth #1163

**Website:** More information and registration information:
